

# Managing merge conflicts

 The GitHub Training Team

Merge conflicts are a normal part of working in Git. Learn why they happen and how to resolve them with ease.

≈ı ǫÖ ħAññ ħ ÆGwǿ

Merge conflicts happen when two people make changes to the same file on GitHub—a common occurrence when you're working with other developers. While resolving differences might involve some discussion, merge conflicts don't have to be scary.

This course guides you through the steps to finding the best merge conflict solution, so your team can keep building.

## What you'll learn

We'll answer common questions like:

- What is a merge conflict and what causes them?
- How do you resolve merge conflicts?
- How do you reduce merge conflicts?

And when you're done you'll be able to:

- Understand how merging happens and what causes merge conflicts

- Resolve simple and complex merge conflicts with ease
- Share best practices to reduce merge conflicts with your team

## What you'll build

---

# GitHub Teacher

Professional Trainer

Charting the knowledge of the Internet, just like Galileo charted the stars.

## Experience

### GitHub, Inc.

GitHub Trainer • March, 2012 — Present

Teach all things Git, give away all the stickers, ensure world peace.

### GitHub, Inc.

Supportocat, GitHub for Business • June 2016 — Present

Provide world class support to customers on the GitHub for Business platform

### GitHub

Intern - Web Developer - Designer • June, 2017 — August, 2017

Redesigned the services.github.com website without a calendar

## Education

### Udacity

Full Stack Webdeveloper Nanodegree • June, 2014 — January, 2015

Most Dedicated Student per Optional Activities Completed

Spent 6 dedicated months working 12 hour days to build out multiple real world apps and websites.

- Completed [source repository](#)
- Completed [resume](#) deployed to GitHub Pages.

## Prerequisites

We recommend taking [Introduction to GitHub](#) prior to this course.

## Projects used

This makes use of the following open source projects. Consider exploring these repos and maybe even making contributions!

- [resume-template](#): A simple Jekyll + GitHub Pages powered resume template
- [Jekyll](#): a simple, blog-aware, static site generator.

## Audience

New developers, new GitHub users, users new to Git, students, managers, teams
