

# npm-build

## Build a package

### SYNOPSIS

```
npm build [<package-folder>]
```

- **<package-folder>** : A folder containing a **package.json** file in its root.

### DESCRIPTION

This is the plumbing command called by **npm link** and **npm install** .

It should generally be called during installation, but if you need to run it directly, run:

```
npm run-script build
```
