

Change which apps run automatically at startup in Windows 10

Here are two ways you can change which apps will automatically run at startup in Windows 10:

- Select the **Start** button, then select **Settings** > **Apps** > **Startup**. Make sure any app you want to run at startup is turned **On**.
- If you don't see the **Startup** option in **Settings**, right-click the **Start** button, select **Task Manager**, then select the **Startup** tab. (If you don't see the **Startup** tab, select **More details**.) Select the app you want to change, then select **Enable** to run it at startup or **Disable** so it doesn't run. Watch the video to see how to do it.
